We are here to help your child **GROW!**

After experiencing disjointed care for his son with autism, Jai Reddy, a successful tech entrepreneur, began designing LifeLab Kids. Jai envisioned an organization that would bring all the different therapeutic programs for children with developmental disabilities under one roof. He also believed that new programs, like technology, music, and art therapy, could unlock even more opportunities for these uniquely talented children. Using this vision, Jai opened the first location of LifeLab Kids in February 2019 as a place where all children with developmental disabilities can GROW.

LifeLab Kids is centered on the belief that Growth Requires Overall WellnessSM. A child's path to the fullest life requires a holistic approach that feeds their mental and physical well-being. LifeLab Kids' programs are intended to draw out a child's strengths by tapping into their passions, offering the same experiences that a typical peer would have, and providing a safe, engaging, and inclusive community. To achieve the best results for each child, LifeLab Kids' collaborative model is empowered by having all the children's therapists under one roof, working together with the families. Our services are open to all children, ages 18 months to 24 years old.

Oakland County Location
3178 Hilton Road, Ferndale, MI 44820
